

Service Reconnection Policy

About this policy

This policy provides guidance on which services can be reconnected in the event of a customer choosing to cancel a service and then choosing to reconnect the same service. It also contains information on the amount of time this may take, and the associated charges.

Please be aware that once a number is disconnected, it is often not possible to retrieve the same number upon reconnection of the service.

Current pricing for each service is shown in our Standard Charges document available from ifacecomms.com

ADSL Broadband

Reconnection is chargeable and takes five (5) working days after placing the order with BT.

Expediting an order is possible and chargeable. This can bring the connection time to within 48 hours of the order being placed with BT, but this is not guaranteed. If the order cannot be expedited, then there is no expedite charge.

FTTC Broadband

Reconnection is chargeable and takes ten (10) working days after placing the order with BT. An engineer visit is required.

Expediting an order is possible and chargeable. This can bring the connection time to within 48 hours of the order being placed with BT, but this is not guaranteed. If the order cannot be expedited, then there is no expedite charge.
